

Hassan Sajjad | Senior Scientist

Current Role Senior Scientist - manage applied machine learning group
Address: Research Complex,
Qatar Computing Research Institute,
Hamad bin Khalifa University,
5825 Doha, Qatar
Phone: +9744541548 (work), +97466863431 (cell)
Email: hasaan.sajjad@gmail.com
Webpage: <https://hsajjad.github.io/>
Google Scholar: <https://goo.gl/H5XPzb>
h-index 24
Languages Urdu (native), English (fluent), German (intermediate), Arabic (basic)

Profile

- PhD. in Computer Science, major in Natural Language Processing
- Published work in top tier venues, such as, ACL, ICLR, AAAI, EMNLP, CSL, and CL
- Taught courses on deep learning from the perspective of NLP and machine translation
- Demonstrated success in taking research into a product for the end users
- Experienced in working in a team and leading teams successfully

Interests – Research and Development, Coaching

- Research and Development Interests
 - Interpretation and analysis of neural models, machine translation, unsupervised and semi-supervised methods, multi-task learning, efficient transfer learning, feature selection, domain adaptation, transliteration, language modeling, contextualized embeddings, social media analysis
 - Low-resource languages, morphologically rich languages, informal and noisy text
- Teaching Interests: Deep learning for NLP, neural networks from scratch, basic computer science courses

Education

- **University of Stuttgart** **Germany**
 - *PhD in Computer Science (Magna Cum Laude)* *2008–2012*
 - Thesis: Statistical models for unsupervised, semi-supervised and supervised transliteration mining
 - Advisor: Prof. Dr. Hinrich Schütze
 - Committee: Prof. Dr. Alex Waibel, PD Dr. Helmut Schmid, Dr. Alexander Fraser, Prof. Dr. Albrecht Schmidt, Prof. Dr.-Ing Stefan Funke
- **National University of Computer and Emerging Sciences** **Pakistan**
 - *Masters in Computer Science (CGPA 3.46)* *2005–2007*
 - Thesis: Part-of-speech tagging for Urdu

- **National University of Computer and Emerging Sciences** **Pakistan**
Bachelors in Computer Science (CGPA 3.45) *2001–2005*
Project: Speaker recognition system

Professional Experience

- **Qatar Computing Research Institute** **Qatar**
Senior Research Scientist *Jan. 2021–*
 - Manage applied machine learning group with a focus on machine translation and interpretation of deep neural network models
 - Work on novel methods to solve various NLP problems, more specifically, machine translation and interpretation of deep neural network models. Publish research at top-tier venues
 - Develop solutions for the end users. Engage in all parts of the NLP pipeline; data creation, cleaning, model building, evaluation, deployment, and client-specific customization.
- **Qatar Computing Research Institute** **Qatar**
Research Scientist *Jan. 2014–Dec. 2020*
 - Managed applied machine learning group, commercialization of machine translation technology ([link](#)), and international collaborations – MIT and H2020 SUMMA project
 - Worked and published research work involving interpretation and manipulation of neural network models, machine translation, domain adaptation, natural language processing of informal text
 - Technology transfer to KanariAI, won several machine translation competitions such as 10th and 13th International Workshop on Spoken Language Translation for English-Arabic language pair
- **Qatar Computing Research Institute** **Qatar**
Post-doctoral Researcher *Feb. 2013–Jan. 2014*
 - Led research work on dialectal Arabic translation and shown significant improvement in quality of the Egyptian Arabic to English machine translation system.
- **University of Stuttgart** **Germany**
Research Assistant and PhD Scholar *Feb. 2008–Oct. 2012*
 - Proposed a novel model for unsupervised transliteration mining that outperformed semi-supervised and supervised methods. Worked on machine translation of closely related languages
 - Conducted PhD
 - Organized the machine translation reading group
- **PolyVista** **United States**
Text Analysis Consultant *Feb. 2012–Jul. 2012*
 - Consulted in hiring a team for their new office in Lahore, Pakistan
 - Streamlined product development to integrate natural language processing applications like part-of-speech tagging, term extraction into a social media analysis platform
- **Microsoft Research** **United States**
Research Intern *Jul. 2011–Oct. 2011*

- Devised an algorithm for query refinement and efficient vertical search that guides users to their target result by engaging them into a dialog
- Granted a patent and published the research work

- **Center for Research in Urdu Language Processing, NUCES**

Pakistan

- *Research Assistant*

Feb. 2006–Feb. 2007

- Worked on Pan Asian Networking Localization project
- Supervised and conducted on-field survey to measure technology dissemination in schools

Tutorials

- Hassan Sajjad, Narine Kokhlikyan, Fahim Dalvi and Nadir Durrani, "[Fine-grained Interpretation and Causation Analysis in Deep NLP Models](#)". In Proceedings of the North American Chapter of the Association of Computational Linguistics: Human Language Technologies (NAACL-HLT).

Teaching Experience

- **NLP with Python** **Qatar**
• [Carnegie Mellon University in Qatar](#) 19-30th Oct. 2020
As part of the NLP with Python course, delivered 6 hours lectures covering the fundamentals of deep learning with practical exercises
- **Deep Learning for NLP** **Germany**
• [University of Duisburg-Essen](#) 9-13th Sept. 2019
15 hours course covering the fundamentals of deep learning from intuition to practical exercises
- **Deep Learning for NLP** **Sri Lanka**
• [International Spring School, University of Moratuwa](#) 16-21st Mar. 2019
15 hours course on the basics of deep learning with hands-on exercises involving several NLP tasks

- From Theory to Practice: Deep Learning for NLP** **Germany**
University of Duisburg-Essen *8-14th Apr. 2018*
 15 hours course covering theory of deep learning models from intuition to practical exercises in Keras ([content](#))
 - Deep Learning for Machine Translation** **Germany**
9th Computational linguistics fall school, DGfS *11-22nd Sept. 2017*
 15 hours course teaching fundamentals of deep learning and its application to machine translation ([content](#))
 - Probability and Statistics** **Pakistan**
National University of Computer and Emerging Sciences *Sept. 2004–Dec. 2004*
 Teaching assistant
 - Calculus** **Pakistan**
National University of Computer and Emerging Sciences *Feb. 2003–Jun. 2003*
 Teaching assistant
-
- Introduction to Natural Language Processing** **Pakistan**
ADDO AI *Nov. 2019–Jan. 2020*
 Course content design and delivery advisor

Patent

- [Search system with query refinement](#) (US Patent Number 9767144B2)
- Method and system for diacritizing Arabic text (pending)

Grants

- Principal Investigator with Prof. Dr. Laura Kallmeyer and Prof. Dr. Stefan Conrad, CRC (SFB) project proposal, Inducing Syntactic Structure
- Qatar Science and Technology Park Accelerator Program 2016 – Grant of 100K USD accelerator funding for Customized Machine Translation

Skills

- Programming languages: Python, Perl, Shell, Keras, PyTorch
- Tools and libraries: Transformers, Nematus, OpenNMT, Moses, Scikit-learn, NLTK

Research Competitions

- Workshop on Building and using Comparable Corpora (2018), French-English parallel corpus extraction
- **Best system** – International Workshop on Spoken Language Technology (2016), Arabic-English translation task
- **Second best system and best system description paper** – NIST Open Machine Translation Evaluation Workshop (2015), Egyptian Arabic to English translation task
- **Second best system** – Shared Task on Automatic Arabic Error Correction (2015)

- **Best system** – International Workshop on Spoken Language Technology (2013), Arabic-English translation task
- **Second best constrained system** – Eighth Workshop on Statistical Machine Translation (2013), English-Russian translation task

Open Source Contributions

- NeuroX - Interpretation and manipulation of deep models (alpha version: [link](#))
- LayerDrop for efficient transfer learning using pre-trained models (integrated into a fork of the huggingface transformer library, [link](#)) ([paper](#))
- Transliteration Mining Tool ([link](#))
- Linguistic Resources
 - AraBench - Dialect Arabic to English evaluation suite ([link](#))
 - The QCRI Educational Domain corpus – a collection of parallel corpora of the education domain in multiple languages ([link](#))
 - English-Hindi and English-Arabic gold set for transliteration mining evaluation ([link](#))
 - Most widely-used part of speech tagset of Urdu and annotated corpus of 100,000 words

Honors and Awards

- Media coverage: pioneer dialectal Arabic translation [Gulf Times](#), [MENAFN](#), [HBKU](#) (Aug. 2020)
- Outstanding reviewer at the EMNLP 2020 conference
- Machine translation technology deployed to BBC and Deutsche Welle as part of the SUMMA project (2019) and tech transfer to [KanariAI](#) (June 2020),
- Media coverage: 1 billion tokens translated by our [machine translation system](#) (Aug. 2020). ([link1](#)), ([link2](#))
- Panelist on discussing NLP Research In Pakistan: Building Synergies and Collaborations at 7th International Conference on Language and Technology (Feb. 2020). ([link](#))
- Media coverage: MIT News covers our work on analyzing and controlling deep models (Feb. 2019) ([link](#))
- Best Innovation Award at the Annual Research Conference 2018, Qatar for our speech translation system ([link](#))
- Media coverage: MIT News covers our work on analyzing representations in deep models (Dec. 2017) ([link](#))
- Qatar Science and Technology Park speed pitching (Nov. 2015) – selected among the top 3 teams out of 26 teams
- Second position in the Qatar Annual Research Conference 2014 for a student research project
- Google sponsorship for participation in the Second Lisbon Machine Learning School
- Full PhD merit-based scholarship from HEC-DAAD for doctoral studies in Germany (4 years)
- Four year scholarship for the bachelors program

Invited Talks and Keynotes

- Exploiting Redundancy in Pre-trained Models for Efficient Transfer Learning. Machine Learning and Data Analytics Symposium, Qatar (Mar. 2021) (**Invited talk**)
- Exploiting Redundancy in Pre-trained Models for Efficient Transfer Learning. Facebook, US (Feb. 2021)
- Exploiting Redundancy in Pre-trained Models for Efficient Transfer Learning. National Research Council (NRC), Canada (Nov. 2020)
- Hidden Linguistics in Deep NLP Models. Heinrich-Heine Universität Düsseldorf, Germany (Oct. 2020)
- Interpreting Deep NLP Models. University of Edinburgh, UK (Apr. 2020)
- Interpreting Deep NLP Models. University of Sheffield, UK (Mar. 2020)
- Efficient Transfer Learning of Pre-trained Model. 7th International Conference on Language and Technology ([link](#)), UET, Pakistan (Feb. 2020) (**Keynote**)
- Interpreting Deep NLP Models: A Case Study on Neural Machine Translation at Google, Salesforce, Bosch, Facebook and Amazon, US (Apr. 2019)
- Hidden Linguistics in Deep NLP Models. Symposium on Natural Language Processing. University of Moratuwa, Sri Lanka (Mar. 2019) (**Keynote**)
- Machine Translation in the Real World. King's College London, UK (Mar. 2019)
- Analyzing Individual Neurons in Deep NLP Models. University of Melbourne, Melbourne, Australia (Feb. 2019)
- Analyzing Individual Neurons in Deep NLP Models. Thomson Reuters, Toronto, Canada (Feb. 2019)
- What do Neural Machine Translation Models Learn about Morphology. Macquarie University, Sydney, Australia (Apr. 2017)
- What do Neural Machine Translation Models Learn about Morphology. University of Melbourne, Melbourne, Australia (Apr. 2017)
- From Phrase-based to Neural Machine Translation. Workshop on Semitic Machine Translation, AMTA, Austin, US (Nov. 2016) (**Keynote**)
- Deep Learning – Neural Machine Translation. Sixth Conference on Language and Technology (CLT16), Lahore, Pakistan (Nov. 2016) (**Keynote**)
- Content Model Applications for Promoting Local Language Content. Workshop on Facilitating Local Language Content Access and Generation using Human Language Technologies, UET, Lahore, Pakistan (Aug. 2015) (**Keynote**)
- Statistical Machine Translation for Community Service: Translating Educational Content. Fifth Conference on Language and Technology (CLT14), Karachi, Pakistan (Nov. 2014) (**Keynote**)
- Separating Transliterations from Translations in Transliteration Mining Context. FBK, Trento, Italy (Oct. 2012)
- Unsupervised Transliteration Mining. School of Science and Engineering, Lahore University of Management and Sciences, Pakistan (Apr. 2012)
- Unsupervised Transliteration Mining, Punjab University College of Information Technology, Pakistan (Apr. 2012)

Professional Services

- Tutorial at NAACL 2021 on Fine-grained Interpretation and Causation Analysis in Deep NLP Models
- Workshop/shared task organization: MT robustness 2019/20 (WMT), BlackBoxNLP 2020/21 (EMNLP)
- Senior PC: AAAI 2021
- Area chair: EMNLP 2021, NAACL 2021 (MT track, and the Interpretation and analysis track), ACL 2020 (NLP applications)
- Conference reviewer: regular reviewer at ACL/EMNLP/NAACL/EACL/COLING
- Conference reviewer: ICML 2021, NeurIPS 2020/21, ICLR 2020/21, AAAI 2019/20, IJCAI 2018/19, EAMT 2017
- Workshop reviewer: IWSLT, WANLP
- Journal reviewer: TACL, ML, NLE, LRE, CSL, PAMI, PLOS-ONE
- Journal review editor: [Language and computation](#)
- [Challenge22](#): proposal reviewer for phase 1 and phase 2 (2017)
- Judge at the annual Hackathon at Carnegie Mellon University - Qatar (27-28th Jan. 2017)
- Judge at the first Alice Competition at Carnegie Mellon University - Qatar (23rd May 2016)

Advising

External PhD Committee

- External Ph.D. Advisor: Samreen Kazi, IBA, Pakistan. Topic: SQUAD for Urdu Language
- External Ph.D. Committee Member: Jamal Abdul Nasir. Lahore University of Management Sciences, Pakistan. 2014

Masters and Bachelor Advising

- Laura Lehmann, LMU Munich, Germany (External examiner of Bachelor thesis titled MulTraLit: a multilingual transliteration system)
- Kamela Ali Al Mannai, HBKU, Qatar (External advisor, Master thesis on Dialect Identification)
- Abdul Rafae, LUMS, Pakistan (External advisor, later did PhD from the Hunter College City University, New York)
- Fahim Dalvi (Research intern, graduated from Stanford University, now working at QCRI)
- Dat Tien Nguyen (Research intern, now a PhD student at the University of Amsterdam)
- Kamela Ali Al Mannai (Research intern, Qatar University)
- Alaa Khader (Research intern, Carnegie Mellon University Qatar)

Participations

- Deep Learning for Machine Translation, Winter School, Dublin, Ireland (18-24th Oct. 2015)
- Dagstuhl Seminar on Statistical Techniques for Translating to Morphologically Rich Languages (2-7th Feb. 2014)
- Taming the social web, 2nd Lisbon Machine Learning School (19-25th Jul. 2012)
- 5th MT Marathon, Le Mans France (13-17 Sept. 2010). Worked with Adam Lopez on Minimum

Risk Decoding in Cdec

- Summer School in Asian Language Processing (Jun.-Aug. 2006)

International Collaborations

- **Massachusetts Institute of Technology (Oct. 2016 – Mar. 2020)**

Interpreting deep neural models

- Role: managed and led the machine translation research agenda from the QCRI side
- Worked on the analysis and interpretation of neural machine translation in its ability to learn various language phenomena

- **Scalable Understanding of Multilingual MediA (Feb. 2016 – Feb. 2019)**

EU Horizon 2020 funded Big Data project aimed at creating a platform to automate the analysis of media streams across several languages

- Role: managed Arabic machine translation component. Responsible for research and development deliverables
- Delivered an Arabic to English neural machine translation system
- Proposed and delivered a language-independent pipeline for Arabic processing

- **Carnegie Mellon University – Qatar (Apr. 2015 – Dec. 2017)**

Natural Language Processing of Dialectal Arabic

- Role: a team player and a manager
- Conducted research on Arabic error correction, dialect identification and spelling standardization
- Ranked second on an Arabic error correction task

- **Karlsruhe Institute of Technology (Mar. 2016 – Jun. 2016)**

German to Arabic Lecture Translation

Project was motivated from the refugee crisis in Europe. It aimed to provide real-time German to Arabic translation to Arabic students in a university hall

- Role: a team player, responsible for German-Arabic data extraction, and translation system
- Faced the challenge of little to no parallel data available for German to Arabic
- Adapted data generation and modeling strategies to build a usable system
- System deployed in university halls
